

Vehicle Safety Circular

# Updated Light Vehicle and PMVI Inspection Station Guidebooks

**Date published:** November 4, 2022

Vehicle Safety has recently updated the Guidebooks for both the Light Vehicle Inspection and Periodic Mandatory Vehicle Inspection programs. These are now available at [MPIPartners > Vehicle Safety](#). Certified inspection stations are required to download these documents, and ensure that all station representatives (qualified mechanics and contact persons) are familiar with the contents.

The specific sections that have been updated are:

- The sections on tools and equipment that inspection stations are required to own and have available in good working order.
- The Central Flagging Points System used during station audits and other warranted situations, such as a validated customer complaint.

Permit holders are required to perform thorough and accurate inspections to ensure the integrity of the program. If you require assistance to apply inspection standards, it is your responsibility to contact Vehicle Safety for guidance or additional training. Vehicle Safety Officers are available Monday to Friday, 8:30 a.m. - 4:30 p.m., excluding designated holidays, at 204-985-0920 (toll-free 1-866-323-0542). You may also email inquiries to [vsi-stationinfo@mpi.mb.ca](mailto:vsi-stationinfo@mpi.mb.ca).
