

Towing & Storage Facilities, including Full Tilt

Upcoming Changes to MPI Salvage Vehicle Storage Requirements (Revised)

Date published: August 27, 2024

Effective Wednesday, September 18, 2024, MPI is updating salvage auction vehicle storage requirements to encourage timely pick up of purchased items.

Starting September 18, MPI will cover storage costs from the auction date until the end of day the following Monday, a total of five days. Starting the Tuesday following the auction, storage fees will be the responsibility of the salvage buyer. This policy applies to salvage stored in Manitoba, including vehicles at MPI's Physical Damage Compound and our Gunn Commercial Compound. Towing and storage facilities may begin charging their own storage rates starting on the Tuesday (day 6) after the sale.

Buyers **must** present a Gate Pass or a Bill of Sale to access and remove vehicles.

Sincerely,

MPI Salvage & Compound Operations
