

Notice to all Accredited Repair Shops

# Catalytic Converter Theft

**Date published:** June 3, 2022

In some cases, availability of replacement catalytic converters is delayed. As a result, MPI may consider a temporary repair of the exhaust system. Any temporary repair must be pre-approved by MPI.

Prior to requesting a temporary repair to an exhaust system, the shop must determine no further damage will occur if the vehicle is operated with a temporarily repaired exhaust system, and the customer must agree to the temporary repair.

Once parts are available, the shop must complete repairs as soon as possible. If the shop is experiencing difficulty having the customer return for repairs, the shop can contact Accredited Repair.

To expedite the approval process, simply send an email to the Accredited Repair Department [Accreditedrepair@mpi.mb.ca](mailto:Accreditedrepair@mpi.mb.ca) requesting approval for temporary repairs.
