Industry Consultation Committee Meeting Items Now Available

Date published: November 26, 2021

As <u>announced</u> on September 29, 2021, as part of establishing a consultation framework under the new LVAA model, MPI has fulfilled our commitment to the Manitoba automotive repair industry by introducing several standing committees.

These committees have been introduced to allow for consistent engagement with the repair trade and its associations to seek regular input on policies and procedures through meaningful discussion.

The information relevant to the work of the <u>Glass Consultation</u>, <u>Program & Accreditation</u>, and <u>Technical</u> and <u>Parts Consultation</u> committees are now available on MPI Partners.
