

Notice to all Accredited Bodyshops

## Plastic Repair – April 2024

**Date published:** April 30, 2024

In consultation with the Parts and Technical committee, the Plastic Repair job aid has been published on the [MPI Partners site](#). Repairing plastic components has always been, and will continue to be an option. This job aid provides general information to allow more consistent application of repair/replacement decisions.

As damage varies with component design and material, shops will need to consider each repair/replacement decision based on the specific component.

If you have any questions about this notice, please contact [MPI Partners](#).
