

Notice to all Accredited Light Vehicle Shops

MPI Repair Industry Consultation Committees

Date published: October 30, 2024

MPI values its relationships with the Manitoba automotive repair industry and wants to ensure you have the opportunity to raise ideas, discuss emerging trends, and share concerns with us.

As part of our established consultation framework that was introduced under the current Light Vehicle Accreditation Agreement (LVAA), we are maintaining our commitment through three standing committees for consistent engagement with the repair trade and its associations to seek regular input on policies and procedures through meaningful discussion.

On September 19, 2024, MPI sent out an invitation for consultation committee membership via email. The selection process has been completed and we are pleased to welcome the following volunteer members to the committees:

Glass Committee

- Vern Sisson, Headingley Auto Glass
- JM Champagne, Glass Lab Auto Glass
- Pierre Debreuil, ACR Auto Glass

Parts and Technical Committee

- Shangri-la Abubo-Humes, Eastside Collision Repairs LTD
- Tully Gawazuk, Murray Chev Brandon
- Brad Kozoway, Mint Autobody

At MPI, we understand the value that both the Automotive Trades Association of Manitoba (ATA) and the Manitoba Motor Dealers Association (MMDA) bring as strong voices who advocate for increased industry collaboration as well as the needs of their members. To ensure the ATA and MMDA have this opportunity to share their voices, each association can designate a person for membership on each committee.

As such, both groups have advised MPI that the following individuals will represent their respective associations on these committees:

Glass Committee

- Rob Boyce, Automotive Trades Association of Manitoba
- Lynsey Wilson, Manitoba Motor Dealers Association

Parts and Technical Committee

- Trevor Kindrat, Automotive Trades Association of Manitoba
- Lynsey Wilson, Manitoba Motor Dealers Association

We will continue to maintain the dedicated page on MPI Partners (MPI Repair Industry Consultation Committees tab), where information relevant to the work of these committees is made available. The next committee meetings will be scheduled for November.

If you have any questions regarding this notice, email [MPI Partners](#).
