Re: Reparability of Aluminum Vehicles Video Series

Manitoba Public Insurance's Research & Training department has produced a new video series on the Reparability of Aluminum Vehicles featuring the Ford Aluminum F150.

Each video features a detailed visual and audio explanation of the repair process for various aluminum components. The videos place an emphasis on proper repair, serving as a tool for repair shops and MPI staff to ensure the accuracy and consistency of aluminum body repairs.

To access the new videos, visit the MPI Partners [Reparability of Aluminum Vehicles Video Series](#) landing page, located in the Light Vehicles & Others > Training section.

If you have any questions about the videos, please contact Research & Training using the [Repair Shop Support Line](#).
