

Updates to Mitchell Cloud Estimating User Interface

Date published: September 19, 2025

Following the Mitchell release on September 9, 2025, users will notice two new updates to the Mitchell Cloud Estimating (MCE) platform:

1. The Integrated Parts option is now available in MCE; however, this option is **not** part of MPI's approved workflow. Users are reminded to continue using the Compare Alternate Parts button to view and select alternate parts and **not** to use the Integrated Parts option.

2. The Compare Parts user interface (UI) has changed to align with Integrated Parts update (see above). This UI change does not affect how parts are selected, and user functionality remains the same.

Note: To reduce clutter and highlight cost-effective alternative parts, Mitchell has removed the OEM part options from the available parts list.
