

Notice to all Accredited Repair Shops

Research & Training Survey - Reminder

Date published: August 18, 2022

Following the discussion at the last [Technical and Parts Committee Meeting in July](#), MPI sent out a survey via email to all accredited auto body repair shops on August 2, 2022. The goal of the survey is to identify potential opportunities for joint research. The results will be compiled and shared with the Technical & Parts Consultation Committee and be used by MPI as part of the ongoing enhancement of these initiatives.

Please click on the following link below to access the survey. The survey is anonymous unless you choose to provide your contact information for follow-up. No shop specific information will be made public, and only grouped data will be shared with the committee.

- Link to survey: <https://interceptum.com/s/en/MPI-RT22>

After following the link, please click “Start” to begin the survey.

In response to feedback provided by some respondents, the survey has been enhanced to allow for viewing of all questions without a need to respond. None of the questions are mandatory and you can only respond to ones of your choice. Respondents can continue to the next question without answering the current one.

For additional clarity, the following was added to the introduction screen: **“You do not have to respond to all the questions, if you are unsure or prefer not to answer a question simply leave it blank and continue on to the next question.”**

If you have any questions about this survey, contact partners@mpi.mb.ca via email or [reach out to one of the committee members](#).
