NOTICE TO ALL DIRECT REPAIR SHOPS

Re: Initial Car-Part Pro Rollout Postponed

MPI continues to strive to align with industry best practices as we update our Alternate Parts Program.

In continuing discussions with the ATA/MMDA, MPI has agreed to postpone the initial roll out of Car-Part Pro to explore an alternative process for the Alternate Parts Program, and the implementation of Car-Part overall. However, this change will require a number of adjustments which are currently being assessed.

Timelines for the alternative process remain unknown until due diligence is completed and the final approach is established. MPI will retain the list of volunteer shops and will reconfirm participation prior to making the final selection for the initial roll out.
