Estimating Standards Reformatted and New Supplier Lookup Tool

Date published: July 16, 2021

In an effort to continuously improve the quality of support documentation that MPI provides to repair facilities, estimating standards found under the [Parts Autonomy](#) section of the MPI Partners website have been reformatted. The new format:

- Enhances the clarity of rules and expectations
- Provides illustrative examples
- Outlines best practices to assist you with proper application of these Estimating Standards

The tables below summarize the changes.

Reformatted	
Accessories	One Dollar Items
Assemblies	Parts Autonomy
Cash Settlements	Restocking Non-Returnable
Core Charges	Shipping/Freight Charges
Estimate Part Selection	Tires
Invoices	Trim Time

Archived in 30 days	
Illegal Parts	Amalgamated in Cash Settlements
Obsolete Parts	Amalgamated in Cash Settlements
Powertrain/Drivetrain	Addressed in Estimate Part Selection
SRS	Addressed in Estimate Part Selection
Warranties	Addressed in Parts Business Rules

An [Alternate Part Supplier Lookup Tool](#) has also been added to the Partners site as a reference to aid repair shops in their part sourcing efforts.

If you have any questions about this notice, please contact Estimatix using the [Repair Shop Support Line](#).
