Estimating Standards – Category Updates

Date published: February 15, 2022

We've recently made some updates to the [Estimating Standards](#) section of MPI Partners.

In the **By Category** index, we've streamlined the page and grouped the Estimating Standards into five new categories:

- Body, Frame & Mechanical Operations
- Claim Administration
- Labour, Material Rates & Allowances
- Parts
- Refinish Operations

This update will make it easier to locate Estimating Standards when you're browsing by category.

We've made similar updates to the [Forms and Job Aids](#) subsection by organizing the documents into three new categories:

- Body, Frame & Mechanical Operations
- Claim Administration
- Parts

Lastly, we've removed hyperlinks to various standards from the [Parts Autonomy Program](#) section. This is to ensure all Estimating Standards can be found in a central location on MPI Partners.

If you have any questions about this notice, please contact Estimating using the [Repair Shop Support Line](#).
