LKQ/Keystone Fuel Surcharge - Update

Date published: July 21, 2022

On June 22, MPI [announced](#) it was aware of potential daily fuel service delivery surcharges being charged by LKQ. MPI has since been in communication with LKQ and they have committed to review billing options in Manitoba over the next month. In the meantime, MPI recognizes there could be instances when the fuel surcharge cannot be avoided. In alignment with [MPI's Shipping & Freight Charges estimating standard](#), repair shops can identify impacted parts with an explanation line and submit for approval.

MPI will assess the outcome of this review and we will send another notice once our final position is determined.

Please email partners@mpi.mb.ca if you have any questions about this notice.
