

Notice to all Accredited Repair Shops

# Parts Program Trial – Unrestricted MAPP Pricing

Date published: March 31, 2022

To further enhance the Parts Autonomy program, MPI will temporarily lift pricing restrictions for suppliers participating in Mitchell Alternate Parts Program (MAPP), beginning on April 1st, 2022 and extending until June 30th, 2022. This proof of concept allows us to assess the impacts of fully adopting a market pricing model, further streamlining the parts program, and simplifying the applicable business rules, by making the full catalog of alternate parts available to repair shops in Manitoba.

The OEM less 26% maximum price requirements, outlined in section 2.1 of the [MPI Parts Business Rules](#), will not apply for the duration of the trial. All MAPP parts including Aftermarket (AM), Remanufactured (RM), and OEM Discount (OEMD) with a price of OEM less \$1 or lower are eligible for selection in Mitchell for use on MPI estimates.

There are no impacts to MPI estimate workflows and users do not need to change any settings. Shops should realize a benefit of additional part sourcing options, as well as some new opportunities to increase their RPS scores.

Please email [partners@mpi.mb.ca](mailto:partners@mpi.mb.ca) if you have any questions about this notice.
