

Notice to all Ultramate/Mitchell Estimating Users

Call for Mitchell Cloud Estimating Pilot Volunteers

Date published: December 22, 2020

As communicated on December 21, Manitoba Public Insurance and Mitchell International will be running a pilot program of Mitchell Cloud Estimating from January 19 to February 28, 2021.

Pilot participants will use Mitchell Cloud Estimating for all new claims beginning on January 19. In-progress estimates that were written in Ultramate/Mitchell Estimating prior to the pilot will be completed in Ultramate/Mitchell Estimating. If the pilot is successful, pilot shops will be permanently migrated to Mitchell Cloud Estimating, with a phased implementation for all other shops beginning on March 23.

Mitchell will provide training to pilot participants in advance of the pilot start date, as well as support for Mitchell Cloud Estimating through existing support channels.

Shops interested in participating in this pilot are asked to express their interest to partners@mpi.mb.ca by **December 28**. MPI will review the list of interested shops and confirm which shops have been selected for participation in the pilot by January 5.
