## NOTICE TO ALL REPAIRCENTER USERS

### **Re: PDR Hail Calculator Updated**

The [PDR Hail Calculator](#) on the MPI Partners site has been updated. The updated calculator now allows you to indicate the number of oversized dents on a panel, as well as whether additional labour time is required to remove optional equipment (such as sunroofs).

The PDR Hail Calculator now features a **Save as PDF** button. Rather than copying and pasting the results in a journal note, click this button to save the calculator's results as a PDF, and then attach the PDF to the estimate or supplement as you would any other file.

The [Job Aid - PDR Hail Calculator](#) and the [Paintless Dent Repair - Hail Estimating Standard](#) have been updated to reflect changes to the calculator.
