Parts Program Trial Extended - Unrestricted MAPP Pricing

Date published: June 10, 2022

On March 31st, 2022 MPI announced a three month [Unrestricted MAPP Pricing](#) trial period. The intent of this proof of concept is to assess the impacts of fully adopting a market pricing model, further streamlining the parts program, and simplifying the parts business rules, by increasing available alternate parts for repair shops in Manitoba.

In order to gather additional data and validate trends observed during the initial trial period, this trial will be extended up to December 31st, 2022. MPI will continue to monitor closely and communicate any future changes as trends evolve.

For the duration of the extended trial period, the OEM less 26% maximum price requirements, outlined in section 2.1 of the MPI Parts Business Rules, will not apply. All MAPP parts including Aftermarket (AM), Remanufactured (RM), and OEM Discount (OEMD) with a price of OEM less \$1 or lower are eligible for selection in Mitchell for use on MPI estimates.

Please email partners@mpi.mb.ca if you have any questions about this notice.
