

Notice to all Accredited Repair Shops

Estimating Standard Update

Date published: November 9, 2021

The **Engine Water Damage** procedures found in the [Peril – Validation & Special Procedures](#) estimating standard have been revised.

This was done to ensure the requirements for approval are in alignment with the steps that a repair shop will take to identify and report on the condition of an engine with suspected water damaged.

If you have any questions about this notice, please contact Estimating using the [Repair Shop Support Line](#).
