

Notice to all Ultramate/Mitchell Estimating Users

# Transitioning to Mitchell Cloud Estimating

**Date published:** December 21, 2020

Manitoba Public Insurance and Mitchell International are collaborating on an initiative to migrate estimating users from Mitchell Ultramate to Mitchell Cloud Estimating. This upgraded estimating platform is designed to simplify the estimating process and allow users to remain fully connected throughout the repair process.

There is no action required for shops at this time. MPI and Mitchell are thoroughly testing the capabilities of Cloud Estimating and its alignment with current estimating processes. A small pilot program of Mitchell Cloud Estimating is scheduled to begin for repair shops on January 19. Assuming a successful pilot, a phased implementation of Mitchell Cloud Estimating will begin on March 23 and conclude at the end of May.

You will receive advance notice of your individual transition date once all testing is complete. Along with a start date, you will be provided with training materials and an invitation to a live webinar where you will be walked through the MPI workflow using Mitchell Cloud Estimating. Representatives from MPI and Mitchell will be available to you during the webinars to assist with any questions you have.

Regular updates with additional information will be provided as the initiative progresses.

For any questions, please contact [partners@mpi.mb.ca](mailto:partners@mpi.mb.ca).
