# Mitchell UltraMate Procedures

**Date published:** October 20, 2021

Following the move to Mitchell Cloud Estimating (MCE), all procedures in the [MPI Estimating Standards](#) have been updated to reflect new MCE processes. As a result, the previous Mitchell UltraMate procedures are no longer available.

It is strongly recommended to write any new estimates in MCE. Nonetheless, MPI recognizes that the former procedures may still be required when repair facilities are completing in-progress claims that were originally created in UltraMate. To support the completion of these in-progress changes, MPI has created the [Mitchell UltraMate Procedures](#) reference document.

If you have any questions about this notice, please contact Estimatix using the [Repair Shop Support Line](#).
