

Invitation to Mandatory Information Session on New Equipment and Safety Inspection Standards

Overview

The Manitoba government's Bill 14, The Traffic and Transportation Modernization Act (TTMA), will come into force on March 1, 2019.

The TTMA amends and updates existing legislation and significantly changes the regulation of traffic and transportation in Manitoba.

As part of The TTMA:

- Vehicle equipment and safety inspection standards will be updated and consolidated into the new Vehicle Equipment, Safety and Inspection (VESI) Regulation.
- The Certificate of Inspection (COI) form will be updated.

To support the transition to VESI and the new COI form, MPI Vehicle Safety is holding mandatory information sessions at service centres across the province in January and February.

All light vehicle and motorcycle inspection stations must send one representative to attend a session.
