

Vehicle Safety Circular

Functional Passenger Heating on Buses

Date published: August 22, 2024

Manitoba Transportation & Infrastructure is introducing a proposed amendment to the Vehicle Equipment, Safety and Inspection Regulation (VESIR), under Manitoba's Highway Traffic Act, which will require functional passenger heating on all buses travelling in Manitoba.

MPI would like to encourage all inspection station operators and qualified mechanics to review and/or comment on the proposed amendment. This is your opportunity to provide feedback on how the inspection criteria will be written before it is incorporated into the regulation.

To view the proposed amendment, please visit [Engage MB](#).
